## Table of Contents

EXECUTIVE SUMMARY	iii.
ACKNOWLEDGEMENTS	viii.
LIST OF TABLES	xiii.
LIST OF FIGURES	xiv.
<b>1. INTRODUCTION</b>	
1.1 Purpose and Scope .....	1.
1.2 Existing Water Quality Impairments in the Watershed .....	3.
1.3 Management Plan Goals .....	4.
1.4 Who was Involved in the Development of the Plan? .....	4.
<b>2. LAKE HEALTH AND WATER QUALITY</b>	
2.1 Why is Water Quality at Risk? .....	5.
2.2 Why is Runoff a Problem? .....	5.
2.3 Why Should We Protect Lakes Waukewan and Winona from Polluted Runoff? .....	6.
2.4 Limnology and Ecology of Lakes Waukewan and Winona .....	7.
2.5 Assimilative Capacity Analysis .....	18.
<b>3. WATERSHED ASSESSMENT</b>	
3.1 Description of the Study Area .....	21.
3.2 Subwatershed Delineations .....	26.
3.3 Land Use/Land Cover .....	27.
<b>4. LAKE SUSTAINABILITY</b>	30.
4.1 Estimation of Current Nutrient Loading .....	31.
4.2 Natural Background Conditions .....	40.
4.3 Future Land Use Projections: Build out Analysis .....	40.
4.4 Selecting a Water Quality Goal .....	45.
<b>5. IDENTIFICATION OF POLLUTION SOURCES IN THE WATERSHED</b>	
5.1 Watershed Nonpoint Source Survey .....	49.
5.2 Shoreline Survey .....	57.
5.3 Prioritization of Mitigation Actions .....	59.
<b>6. MANAGEMENT STRATEGIES</b>	
6.1 Goals for Long-term Protection .....	63.
6.2 Addressing Nonpoint Source Pollution .....	64.
6.3 Adaptive Management Approach .....	67.
<b>7. PLAN IMPLEMENTATION AND EVALUATION</b>	
7.1 Action Plan .....	69.
7.2 Indicators and Benchmarks to Measure Progress .....	91.
7.3 Estimated Costs and Technical Assistance Needed .....	93.

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

---

7.4 Evaluation of the Plan.....	94.
7.5 Conclusion .....	95.
ADDITIONAL RESOURCES	96.
REFERENCES	98.
APPENDICES	100.
A. Site Specific Project Plan	101.
B. Thematic GIS Maps	113.
C. Waukewan Watershed Stream Surveys	119.
D. Lake Waukewan Notice of Decision - Final Operating Level	126.
E. List of Prioritized BMP Sites in the Waukewan Watershed	158.
F. BMP Conceptual Designs	173.
G. BMP Final Designs	179.

## List of Tables

<u>TABLE</u>	<u>PAGE</u>
1. Watershed Characteristics and Lake Morphology	8.
2. Total Phosphorus and Chlorophyll-a Criteria for Aquatic Life Designated Use	9.
3. Summary of water quality data for 10-year period for Lakes Waukegan and Winona	11.
4. Summary of Dissolved Oxygen data for 2004-2015 for Lakes Waukegan and Winona	11.
5. Statistics for lake tributaries in the study watershed	18.
6. Municipalities, associated acreage and percent of land cover in the Waukegan watershed	22.
7. Change in Population from 2000-2010 of the five Watershed Municipalities	22.
8. Comparison of land area in each subwatershed	27.
9. Land cover statistics for subwatersheds in the study watershed.	29.
10. Internal loading calculations for Lakes Waukegan and Winona.	32.
11. Density estimate of waterfowl along the shorelines of the study lakes	33.
12. Results of Lake Loading Response Model (LLRM) calculations for phosphorus inputs to Lake Winona and Lake Waukegan.	35.
13. LLRM results of subwatershed phosphorus loading for Lake Waukegan	37.
14. LLRM results of subwatershed phosphorus loading for Lake Winona	38.
15. Comparisons between LLRM predicted phosphorus concentrations and median data from field samples.	39.
16. Buildable area by zone for portions of Center Harbor, Meredith, and New Hampton, NH within the Lake Waukegan watershed.	42.
17. Existing and projected buildings for portions of Center Harbor, Meredith, and New Hampton, NH within the Lake Waukegan watershed.	42.
18. Comparison of phosphorus loading and in-lake response under various development scenarios	45.
19. In-lake concentrations of Phosphorus and Chlorophyll-a, compare to actual observed field data	47.
20. Lake data and possible water quality goals, with phosphorus reduction estimates	48.
21. NPS Sites by Land Use and Impact	52.
22. Average shoreline disturbance scores for each category evaluated, and the total average score for each lake.	58.
23. Cost Estimates of common Best Management Practices	60.
24. Top 6 BMP sites in the Lake Winona and Waukegan subwatersheds	62.
25. Summary of cost estimates and total phosphorus (TP) reductions for sites identified by the shoreline survey as needing buffer plantings.	65.
26. Summary of total phosphorus (TP) reductions and estimated costs of priority BMP implementations at Lake Waukegan and Lake Winona	66.
27. Lake Waukegan/Winona Action Plan – Best Management Practices	70.
28. Lake Waukegan/Winona Action Plan – Wastewater Systems	72.
29. Lake Waukegan/Winona Action Plan – Municipal Ordinance Review	76.
30. Lake Waukegan/Winona Action Plan – Education and Outreach	82.
31. Lake Waukegan/Winona Action Plan – Water Quality Monitoring	88.
32. Environmental Indicators	91.
33. Programmatic Indicators	92.
34. Social Indicators	93.
35. Estimated Annual and 10-year costs for watershed restoration	94.

## List of Figures

<u>FIGURE</u>	<u>PAGE</u>
1. Bathymetry map for Lake Winona and Lake Waukegan	8.
2. Map showing locations of deep sampling stations on Lakes Winona and Waukegan	12.
3. 10-Year Median Total Phosphorus Summer Epilimnion Concentrations, Deep Spots, Lake Waukegan and Winona	13.
4. Historical Water Quality Data for Lake Waukegan and Lake Winona	14.
5a. Dissolved Oxygen Profiles for Lake Waukegan	16.
5b. Dissolved Oxygen Profiles for Lake Winona	17.
6. Conceptual diagram for the determination of Assimilative Capacity for a waterbody	19.
7. Graph depicting results of the Assimilative Capacity analysis for total phosphorus for Winona Lake and Lake Waukegan	21.
8. Lake Waukegan and Winona watershed	21.
9. Population density in the study area, by US Census block.	23.
10. Hydrologic Soils Map for the Winnepesaukee River Watershed	24.
11. Direction of water flow of ponds and lakes within the Waukegan watershed.	24.
12. Map of 2010 fish stream survey locations in the Lake Waukegan watershed	25.
13. Subwatersheds in the study area.	26.
14. Land Cover in the study area	27.
15. Percent land area for the Winona Lake and Lake Waukegan watersheds	28.
16. Breakdown of the Urban land use category by watershed.	28.
17. Graphic showing the productivity/trophic classification of lakes	30.
18. Generalized Watershed Nutrient Loading and Lake Response Model Schematic	31.
19. Percent phosphorus contribution by source in the Lake Waukegan and Winona watersheds.	35.
20. Comparison of land area to corresponding contribution of phosphorus in the Waukegan and Winona watersheds.	36.
21. LLRM estimated phosphorus loading by subwatershed.	38.
22. Development constraints in the Waukegan watershed	40.
23. Buildable area by zone for portions of Center Harbor, Meredith, and New Hampton, NH	41.
24. Existing and projected buildings for portions of Center Harbor, Meredith, and New Hampton NH within the Lake Waukegan watershed.	43.
25. Full build-out projections of the study area using 10, 20, and 30-year compound annual growth rates.	44.
26. Map of Nonpoint Source Sites identified in the Waukegan watershed	51.
27. Number of NPS Sites by Land Use	52.
28. Erosion Site Impact Ratings	53.
29. Site Cost Ratings	53.
30. Lake Winona parcel receiving a final score of 7.	57.
31. Lake Waukegan parcel receiving a final score of 12.	57.
32. Lake Waukegan parcel scores	58.
33. Lake Winona parcel scores	58.
34. Map of top 12 BMP sites identified as having highest impact and lowest cost per pound of phosphorus removed.	61.
