

Lake Waukegan and Lake Winona Watershed Management Plan. These indicators are listed in Section 7.2 and are intricately tied to the action items identified in the Action Plan.

## 7.0 Plan Implementation

Plan implementation will be led by the Waukegan Winona Lake Study Advisory Committee. Local participation is an integral part of the success of this plan, and should include the leadership of NHDES, local municipalities (including Meredith, New Hampton, Center Harbor, Holderness, and Ashland), local lake associations, local schools, community groups, local businesses, road associations, and individual landowners. The advisory committee will need to meet regularly and be diligent in coordinating resources to implement practices that will reduce NPS pollution in the Lake Waukegan and Lake Winona watershed.

### 7.1 Action Plan

The Action Plan was developed through the combined efforts of the LWA and FB Environmental, as well as the advisory committee. The Action Plan is a critical component of the plan because it provides a list of specific strategies for improving water quality and the means to make the water quality goals a reality. The Action Plan consists of action items to help address threats identified within five major categories in no particular order of priority:

- Best Management Practices (BMPs)
- Wastewater Systems
- Municipal Ordinances, Planning, & Land Conservation
- Education & Outreach
- Water Quality Monitoring

In addition to the goal of nutrient (phosphorus) reduction, the Action Plan was also developed to foster thinking about long-term strategies for improving the water quality and related natural resources within the watershed, and to promote communication between citizens, municipalities, and state agencies. The Action Plan outlines responsible parties, potential funding sources, approximate costs, and an implementation schedule for each task within each category. Current cost estimates for each action item will need to be adjusted based on further research and site design considerations.

#### **Best Management Practices (BMPs)**

Best Management Practices (BMPs) are restoration tools that property owners can use to minimize impacts from stormwater runoff and restore degraded areas, particularly along shorelines that feed directly to the lakes. This could be as simple as planting vegetated buffers, installing gravel

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

driplines along roof edges, and ensuring that runoff from paths and driveways is filtered into the ground rather than running overland and into the lake. Coordination with landowners is crucial for successful implementation of BMPs identified in this Action Plan because mitigation measures will need to be implemented on private land. The 2014 watershed and shoreline surveys identified and prioritized several areas within the watershed that should be treated for erosion and/or stormwater runoff issues.

**Table 27. Lake Waukewan/Winona Action Plan – Best Management Practices**  
**WATERSHED BEST MANAGEMENT PRACTICES (BMPs)**

| ACTION ITEM                               | DESCRIPTION  | RESPONSIBLE PARTY                            | FUNDING SOURCE                      | SCHEDULE  | ESTIMATED COST |
|---|--|--|-------------------------------------|-----------|----------------|
| Priority BMPs                             | 1) Conduct stakeholder review of the BMP matrix and top prioritized sites to ensure that targeted sites are appropriate for the watershed and local interests.           | Lake Associations, WWLSAC, Towns             | N/A                                 | 2015-2025 | N/A            |
|   | 2) Implement BMPs at top priority sites identified from the 2014 watershed survey for both lakes.  | Lake & Homeowner Associations, BCCD, Towns   | NHDES, Towns, Private, Other Grants | 2015-2025 | \$74,000*      |
|   | 3) Work with landowners to stabilize shorelines identified in the 2014 shoreline survey.   | Lake Associations, NHLAKES, BCCD, Towns      | NHDES, Towns, Private, Other Grants | 2015-2025 | \$63,000*      |
| NPS Tracker & BMP Monitoring              | 1) Track pollutant reductions as sites are identified and BMPs are implemented. Recommend using NPS Tracker template.  | LWA, BCCD, Volunteers, Towns                 | NHDES, Towns, Volunteers            | 2015-2025 | \$100/yr       |
|   | 2) Re-survey implemented BMP sites every five years and develop a tracking system to document long-term functionality. Obtain digitized parcel data before re-surveying. | Lake Assns, BCCD, Volunteers, Towns          | NHDES, Towns                        | 2015-2025 | \$1,000        |
| Shoreline Surveys                         | 1) Conduct a shoreline survey every 5-10 years to track changes in shoreline development over time.  | WWLSAC, WWAC, Lake & Homeowner Assns., Towns | Volunteers                          | 2015-2025 | \$2,000        |
| NH Lakes Conservation Corps (NH LAKES CC) | 1) Enlist the NH LAKES Conservation Corps for implementation and outreach activities throughout the watershed.   | Lake Associations, NH LAKES, BCCD, Towns     | N/A                                 | 2015-2025 | N/A            |
| Plant Sale                                | 1) Organize and host an annual spring plant sale. Locally-sourced, native plants can be used for shoreline buffer plantings by landowners.                               | BCCD, Volunteers                             | LWA, BCCD, Grants, Donations        | 2015-2025 | \$500/yr       |

\*Cost estimates include initial cost of BMP plus associated annual costs over a 10-year period.

### Wastewater Systems

Septic system effluent typically stores a thousand times the concentration of phosphorus in lake waters, which means that a small amount of effluent could have a major impact on the lake. An old

or improperly-maintained septic system can also result in the delivery of chemicals and hormones used in pharmaceutical and personal care products, as well as the delivery of disease-causing bacteria or viruses that cause gastro-intestinal illness in swimmers. Inundation of systems by groundwater greatly enhances the transport of phosphorus and pathogens to the lake. Therefore, it is critical to ensure adequate setbacks and good vertical separation from the seasonally-high groundwater table.

Based on the watershed modeling that has been completed, septic systems are the third and second largest source of phosphorus to Lake Waukewan and Lake Winona, respectively. The contribution of septic systems was estimated to provide 9% (28.3 kg TP/yr) and 13% (13.6 kg TP/yr) of the total phosphorus load to Lake Waukewan and Lake Winona, respectively. A wastewater inspection and maintenance program will help reduce phosphorus and bacteria loading to these lakes. Significant reductions in phosphorus loading to the lakes will be achieved if landowners take responsibility to evaluate and maintain their systems, and make necessary upgrades, especially to old systems, cesspools, and outhouses.

## A Watershed Restoration Plan for Lake Waukegan and Lake Winona

**Table 28. Lake Waukegan/Winona Action Plan- Wastewater Systems**

| WASTEWATER SYSTEMS              |  |  |  |           |                |  |
|---------------------------------|--|--|--|-----------|----------------|--|
| ACTION ITEM                     | DESCRIPTION  | RESPONSIBLE PARTY                      | FUNDING SOURCE                           | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)   |
| <b>SEPTIC SYSTEMS</b>           |  |  |  |           |                |  |
| Initial Septic System Inventory | Conduct a comprehensive septic system survey of all properties within 250 ft. of a critical waterbody.   | LWA, Towns, Consultants                | Towns, NHDES, Other Grants               | Completed | \$5,000        | Completed in 2014 by LWA.  |
| Septic Database                 | Encourage town officials to track septic system pumping and upgrades; maintain database based on recent comprehensive septic system survey completed by LWA.   | Lake Associations, WWLSAC, WWAC, Towns | Towns                                    | 2015-2025 | \$1,000        | Initial database exists for properties located within 250 ft of Lakes Waukegan and Winona  |
| Mandatory Inspections & Pumping | 1) Continue progress toward development and implementation of an ongoing septic system inspection program to identify failed systems in the 250 ft. shoreline zone around Lake Waukegan and Lake Winona. | Towns                                  | NHDES, Towns                             | Ongoing   | \$1,000/yr     | Meredith adopted Health Regulation in 2013 requiring evaluation of certain properties within 250 ft. of Lake Waukegan. Requires re-evaluation every 5 yrs. |
|                                 | 2) Require inspections and maintenance of septic systems and repair at time of property transfer. \$250-\$500/system   | Towns, State, Landowners               | Landowners                               | 2015-2025 | N/A            |  |
|                                 | 3) Require inspections and maintenance of septic systems for all new permit requests. \$250/system   | Towns, State, Landowners               | Landowners                               | 2015-2025 | N/A            |  |
| Dye Testing                     | Encourage and help fund voluntary dye testing for homeowners to evaluate septic system performance. Goal: 20 systems.  | WWLSAC, WWAC, Towns                    | NHDES, Towns                             | 2015-2017 | \$75/system    |  |
| Community Septic Systems        | Install community septic systems for cluster developments (campgrounds & small camps with outhouses). Goal: 2 communities at \$30,000 each.  | Towns, Landowners                      | NHDES, Other Grants, Low- Interest Loans | 2016-2018 | N/A            |  |

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

| ACTION ITEM                | DESCRIPTION  | RESPONSIBLE PARTY                    | FUNDING SOURCE             | SCHEDULE         | ESTIMATED COST  | STATUS (As of June 2016)  |
|----------------------------|--|--------------------------------------|----------------------------|------------------|-----------------|---|
| Landowner Assistance       | 1) Offer landowner assistance (technical, permitting, and grants) for septic system maintenance and upgrades.                                      | LWA, NHDES, Towns                    | NHDES                      | 2015-2025        | \$1,000/yr      | LWA provided 9 Cost Share Grants in 2014/2015 to property owners to replace failing septic systems. A total of 15 systems were upgraded, resulting in a reduction of 5.3 kg TP/year to Lake Waukewan.   |
|                            | 2) Coordinate group septic system pumping discounts.   | Lake & Homeowner Associations, Towns | Towns, Private             | 2015-2025        | N/A             |   |
|                            | 3) Investigate grants and low-interest loans to provide cost-share opportunities for septic system upgrades.                                       | Lake Associations, Towns, Landowners | NHDES, USDA Towns, Private | Completed        | N/A             | List of potential funding sources available for wastewater improvement projects drafted in 2012 and updated Feb. 2015   |
|                            | 4) Establish a finance program for septic system upgrades in cases of economic hardship  | Towns                                | Towns                      | 2015-2025        | N/A             | Meredith has a finance program in place.  |
|                            | 5) Develop a long-term funding source for septic system upgrades in the watershed.   | LRPC, Towns                          | Grants, Donations          | 2015-2025        | N/A             |   |
| <b>SEWER SYSTEM</b>        |  |                                      |                            |                  |                 |   |
| Sewer Expansion Mitigation | <b>1) Make appropriations for a feasibility study to examine expansion of the Meredith sewer system around the southwest end of Lake Waukewan.</b> | <b>Town of Meredith</b>              | <b>Town of Meredith</b>    | <b>Completed</b> | <b>\$10,000</b> | <b>Completed in May 2009. Report can be found on the Town's website at: <a href="http://www.meredithnh.org/Joomla/pdffiles/ws/Sewer%20Extension%20Study.pdf">http://www.meredithnh.org/Joomla/pdffiles/ws/Sewer%20Extension%20Study.pdf</a></b> |
| Sewer Database             | 2) Ensure that prioritized sewer replacement projects in Meredith are completed in a timely manner.  | Town of Meredith                     | Town of Meredith           | Ongoing          | N/A             |   |
|                            | Encourage town officials to update sewer system connection map; develop database.  | LRPC, Town of Meredith               | Town of Meredith, NHDES    | 2015-2025        | \$1,000         |   |

**Note:** Blue highlighted areas indicate action item has been completed or is in process.

### **Municipal Ordinances, Planning, & Land Conservation**

Municipal land-use regulations are a guiding force for where and what type of development can occur in a watershed, and therefore, how water quality is affected because of this development. The buildout analysis conducted by FB Environmental indicates that there is considerable need for improvement in protecting water quality through non-structural BMPs, such as municipal ordinance adoption or revisions for new or re-development. Action items related to this element have been divided into those relating to wastewater systems, development planning, other regulations, good housekeeping, and land conservation. These action items will help guide municipalities in making effective ordinance or regulation changes that protect water quality within the Lake Waukewan/Winona watershed.

*Refer to Table 29. Lake Waukewan/Winona Action Plan- Municipal Ordinance Review*

### **Education & Outreach**

Education and outreach activities can be used to enhance public understanding of the water quality and encourage community participation in watershed restoration and protection activities. Much effort has already been done by various groups (e.g. Towns of Meredith, New Hampton, Center Harbor, WWAC, local lake associations, LWA, Lakes Region Planning Commission (LRPC), Belknap County Conservation District (BCCD), New Hampshire Lakes Association (NH LAKES), etc.) in the watershed to educate, communicate, and coordinate with the community for the protection, preservation, and improvement of the quality of Lake Waukewan and Lake Winona. Local lake associations and the Waukewan Watershed Advisory Committee are the primary entities for education and outreach campaigns in the watershed and for implementation of this plan. The various local lake associations and the WWAC should continue all aspects of their education and outreach programs and consider developing new ones or improving existing ones to reach more watershed residents.

*Refer to Table 30. Lake Waukewan/Winona Action Plan - Education and Outreach*

### **Water Quality Monitoring**

Monitoring programs are crucial for evaluating the effectiveness of watershed planning activities and determining if water quality goals are being achieved over the long-term. This Action Plan includes recommendations for enhancing current water quality monitoring efforts, including sample collection from lakes and tributaries, and continuation of the Weed Watch and Lake Host programs. Since volunteers typically conduct many different monitoring activities, it will be critical to continue building on the success of the local lake associations' ongoing education, outreach, and water quality monitoring programs.

**Lake Monitoring** – It is recommended that monitoring continue at all existing lake sampling locations. Alterations to the monitoring plan may include:

- ***Increase sampling frequency*** to examine how nutrients are distributed in the water column and processed throughout and outside of the growing season.
- ***Sampling at pre-determined times of year to maintain a consistent dataset.*** Such times could include spring turnover, peak of summer algal growth, and fall turnover.
- ***Promoting advanced research collaborations with other groups*** active in the lake system to collect data with more frequency and for additional parameters. Consider working with universities to develop a cyanobacteria monitoring program, conduct a sediment core study for the lakes, or conduct a boat traffic study.
- ***Conducting a dissolved oxygen study at the lakes.*** Both lakes have issues with DO depletion in the deeper waters through the summer. Collecting temperature and DO profiles with greater frequency (and year-round) could help determine the extent of DO depletion and how it relates to sediment phosphorus release.

**Tributary Monitoring** – It is recommended that monitoring continue at all existing tributary sampling locations. Alterations to the monitoring plan may include:

- ***Capturing water samples at new sites and year-round*** to better quantify pollutant loading from tributaries in the watershed.
- ***Capturing water samples during storm events*** to examine peak discharges and measure inputs of sediment and nutrients during heavy rains. These samples may be collected either by manual or automated grab sampling during storm events; these automated sampling devices are deployed at collection sites and triggered to fill when water rises to a pre-determined level (e.g., the samplers may be positioned so that they fill when the water rises 6 inches).
- ***Deploying data loggers to capture continuous water quality information.*** Data sondes and loggers may be deployed at strategic locations in rivers, streams, and lakes to capture continuous (e.g., every 30 minutes) data on a number of parameters, including water temperature, dissolved oxygen, specific conductivity, turbidity, and chlorophyll-a or algae abundance. Data such as these could be valuable for understanding water quality processes in the watershed.
- ***Using water level loggers.*** These are a specific type of logger that measure continuous water level in a river, stream, or lake. In flowing waters, water level can be converted to stream discharge. Coupled with water chemistry data, loading rates of nutrients may also be calculated with continuous flow data.

***Refer to Table 31. Lake Waukewan/Winona Action Plan - Water Quality Monitoring***

## A Watershed Restoration Plan for Lake Waukegan and Lake Winona

**Table 29. Lake Waukegan/Winona Action Plan- Municipal Ordinance Review**

| MUNICIPAL ORDINANCES, PLANNING, & LAND CONSERVATION   |  |                              |                |           |                |   |
|---|--|------------------------------|----------------|-----------|----------------|---|
| ACTION ITEM   | DESCRIPTION  | RESPONSIBLE PARTY            | FUNDING SOURCE | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)  |
| <b>WASTEWATER SYSTEMS REGULATIONS</b>   |  |                              |                |           |                |   |
| Septic System Regulations Assessment  | 1) Review septic system rules for all watershed towns.   | LWA, Towns                   | Towns, Grants  | Completed | \$1,500        | 2009 - Review of Town regulations by Meredith and in 2013 by LWA as part of Septic System Improvement Initiative  |
| Septic System Permitting  | 1) Require a permit for the replacement or repair of septic systems to ensure proper installation.                   | Towns                        | Towns, Fees    | 2015-2017 | N/A            | The Town of Meredith adopted a Health Regulation in 2013 that addresses septic permitting. New Hampton and Center Harbor should consider adopting a similar regulation. |
|   | 2) Require upgrade, repair, or replacement of septic systems with building permits.                                  | Towns                        | Towns, Fees    | 2015-2025 | N/A            |   |
|   | 3) Improve septic system regulations/ordinances to consider more than just number of bedrooms when doing expansions. | LRPC, Towns                  | Towns, Fees    | 2015-2025 | N/A            |   |
| Enforcement   | 1) Communicate with town departments to enforce occupancy loads and have septic system inventories in Master Plans.  | LRPC, Towns, Planning Boards | Towns          | 2015-2025 | N/A            |   |
| <b>DEVELOPMENT PLANNING</b>   |  |                              |                |           |                |   |
| Plan Adoption   | 1) Incorporate watershed plan recommendations into town master plans.  | Towns                        | Towns          | 2015-2020 | N/A            |   |
| Conservation Subdivisions   | 1) Increase incentives for conservation subdivisions in town ordinances.   | LRPC, Towns                  | Towns          | 2015-2020 | \$1,500        | Meredith has a Conservation Subdivision Ordinance. Center Harbor has a Cluster Subdivision Ordinance, New Hampton encourages Cluster Development design.                |
|   | 2) Adopt open space guidelines for conservation subdivisions.  | LRPC, Towns                  | Towns          | 2015-2020 | N/A            |   |
| Low Impact Development (LID)  | 1) Develop new policy to encourage LID for all future development.   | LRPC, Towns, BCCD            | Towns, Grants  | 2015-2020 | \$1,500        |   |
| <b>Note:</b> Blue highlighted areas indicate action item has been completed or is in process. |  |                              |                |           |                |   |

## A Watershed Restoration Plan for Lake Waukegan and Lake Winona

| ACTION ITEM                      | DESCRIPTION  | RESPONSIBLE PARTY                                       | FUNDING SOURCE                      | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)   |
|----------------------------------|--|---|-------------------------------------|-----------|----------------|--|
| Setbacks, Buffers & Lot Coverage | 1) Improve ordinances to include mandatory setbacks, riparian buffers between development and waterbodies, and maximum lot coverage restrictions.  | LRPC, Towns   | Towns, Grants                       | 2015-2020 | \$1,500        |  |
|                                  | 2) Base zoning on "maximum % impervious cover allowed" rather than "% green space required."   | LRPC, Towns   | Towns                               | 2015-2020 | N/A            |  |
|                                  | 3) Determine current and future impervious cover for watershed towns so that communities can make better informed planning decisions.  | LRPC, Towns, Consultant                                 | LWA, Towns                          | 2015-2020 | \$5,000        |  |
|                                  | 4) Review and lower limits of impervious cover by zone to less than 10-20% imperviousness.   | Towns, Consultant                                       | LWA, Towns                          | 2015-2020 | \$1,500        |  |
|                                  | 5) Limit amount of tree removal and/or expand ordinance to include logging.  | State, LRPC, Land Trusts, Towns, Lake Assns, Landowners | Federal Grants (NRCS, EPA), Private | 2015-2020 | \$1,500        |  |
| Overlay Districts                | Adopt a watershed overlay district that directs development away from ecologically-sensitive areas, guides construction and development, and prohibits high risk land uses.                            | Towns   | NHDES, Towns                        | Completed |                | Meredith (2006) and New Hampton (2008) adopted a Lake Waukegan Watershed Overlay District. Center Harbor has a 5 ac minimum for rural and agriculture zones. In March 2016, Center Harbor adopted a Water Resources Conservation Overlay District Ordinance, <a href="http://www.centerharbornh.org/sites/centerharbornh/files/pages/zoning-chapter-10.pdf">http://www.centerharbornh.org/sites/centerharbornh/files/pages/zoning-chapter-10.pdf</a> |
| Erosion Control BMPs             | 1) Require erosion control BMPs through the development review process, including construction inspection and site stabilization. Distinguish between temporary and permanent erosion control methods. | Town Planning Boards, Code Enforcement Officers         | Towns, Fees                         | 2015      | N/A            | This has been completed for Meredith, but should also be completed for the other watershed towns.  |
|                                  | 2) Require formal construction agreements that specify sequencing, inspections, and reports, for both temporary and permanent controls.  | Town Planning Boards, Code Enforcement Officers         | Towns, Fees                         | 2015      | N/A            |  |
|                                  | 3) Integrate Erosion and Sediment Control Regulations with Stormwater Regulations.   | Towns   | Towns                               | 2015      | N/A            |  |

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

|                          |  |                               |                     |           |         |   |
|--------------------------|--|-------------------------------|---------------------|-----------|---------|---|
|                          | 4) Strengthen Erosion and Sediment Control Regulations by moving it from Site Plan Review and Subdivision Regulations to an Ordinance.   | Towns                         | Towns               | 2015      | N/A     |   |
|                          | 5) Review procedures and regulations for maintenance of BMPs and existing vegetation.  | LRPC, BCCD, Towns             | Towns               | Ongoing   | N/A     |   |
| Stormwater Regulations   | 1) Implement a comprehensive stormwater management plan in the watershed that prevents potential harmful and destructive effects of stormwater runoff.   | Towns, NHDES, NHDOT           | NHDES, Other Grants | 2015      | N/A     | Current update to the Waukewan Watershed Management Plan will quantify pollutant loads and assist the municipalities in identifying measures to reduce loading. |
|                          | 2) Review effectiveness of existing stormwater regulations and practices in the watershed communities, and update the regulations as necessary.  | LRPC, Towns, NHDES, NHDOT     | NHDES, Other Grants | Completed | N/A     | 2013 - LRPC completed a study for Meredith, Laconia, and Gilford. Review should be done for other watershed towns.  |
|                          | 3) Ensure that stormwater BMPs are incorporated in land use planning, zoning, and subdivision/site plan reviews.   | Towns, Planning Boards, NHDES | Towns               | 2015      | N/A     |   |
|                          | 4) Map all watershed catch basins, culverts, and stormwater discharge points in the watershed.   | LRPC, Towns, Consultant       | LWA, Towns          | 2015-2025 | \$5,000 |   |
|                          | 5) Clearly define imperviousness or impervious surfaces in documents.  | LRPC, Towns                   | LWA, Towns          | 2015-2025 | N/A     |   |
|                          | 6) Consider the use of different stormwater standards for treatment (e.g. more frequent storms vs. retention during 25-50 yr. size storms).  | Town Planning Boards          | Towns               | 2015-2017 | N/A     |   |
| Enforcement              | Employ a single code enforcement officer for purposes of permitting, inspection, and compliance for watershed towns. Ensure consistent application of the provisions of the Shoreland WQ Protection Act. | Towns                         | Towns               | Ongoing   | N/A     | Meredith Code Enforcement Officer coordinates with the other towns in the watershed.  |
| <b>OTHER REGULATIONS</b> |  |                               |                     |           |         |   |

## A Watershed Restoration Plan for Lake Waukegan and Lake Winona

|                               |  |   |         |           |     |  |
|-------------------------------|--|---|---------|-----------|-----|--|
| Heating Fuel Tank Regulations | 1) Adopt an ordinance that requires new or replacement installations for residential heating fuel storage have either double-walled tanks or secondary containment, be weather protected if located outdoors, and have encapsulated lines. | Towns, Code Enforcement Officers, Fire Departments, NHDES | Towns   | 2015-2020 | N/A |  |
|                               | 2) Ensure local enforcement of state code requirements for oil burning equipment installations and tank replacements (e.g. fill alarms with audible whistle, use of UL-approved tanks, protected lines, etc.).                             | Code Enforcement Officers, Fire Departments               | Towns   | 2015-2020 | N/A | Meredith Fire Chief states this is N/A for residential and cites NFPA 211 as code. |
|                               | 3) Encourage, or where necessary require, inspection and testing of residential heating fuel tanks.  | Oil Industry  | Private | 2015-2020 | N/A |  |
| Heating Fuel Tank Regulations | 4) With the assistance of local home heating fuel distribution companies, create a database of existing residential fuel tanks which include an inventory of tank age, type, volume, etc.  | Town Planning Departments, Oil Industry                   | NHDES   | 2015-2020 | N/A |  |
| Recreational Regulations      | 1) Encourage enforcement of RSA 270-D:2 "General Rules for Vessels Operating on Water."  | NH Marine Patrol, NHDES, LWA, Towns                       | N/A     | Ongoing   | N/A |  |
|                               | 2) Post prohibitions outlined by NHDES Administrative Rule Env-Ws 386.49 at public access points to the lakes.   | Town Water Departments                                    | Towns   | Ongoing   | N/A |  |
|                               | 3) Write a letter to entities that provide aviation training in the watershed and request that they discontinue use of Lake Waukegan as a flight training area. A copy of this letter should be sent to the Seaplane Pilots Association.   | Town Board of Selectmen                                   | N/A     | Completed | N/A | Letter sent requesting aviation training entities not use Lake Waukegan. Result?   |
|                               | 4) Prohibit fueling of airplanes and establishment of commercial seaplane bases in the watershed.  | Towns   | N/A     | Ongoing   | N/A |  |
|                               | 5) Adopt an ordinance to restrict or prohibit use of fireworks under NH RSA 160-B:10.  | Towns   | N/A     |           |     |  |

## A Watershed Restoration Plan for Lake Waukegan and Lake Winona

|                             |   |   |                           |           |     |  |
|-----------------------------|---|---|---------------------------|-----------|-----|--|
| Hazardous Waste Regulations | 1) Review progress of facilities classified as "hazardous waste handlers" or Resource Conservation and Recovery Act sites (RCRA) in the watershed.  | Town Water Departments, NH DES                      | N/A                       | Ongoing   | N/A | Searchable database on NHDES website should be reviewed every 2 years. <a href="http://des.nh.gov/onestop/index.htm">http://des.nh.gov/onestop/index.htm</a>   |
|                             | 2) Determine discharge location of floor drains at two businesses in the watershed and develop a spill prevention plan for each.  | Meredith Water Department                           | Meredith Water Department | Completed | N/A |  |
|                             | 3) Send letter to the NHDOT Railroad Bureau and owners of the railroad requesting that all stockpiles of abandoned railroad ties along the railroad right-of-way around Lake Waukegan be removed.   | Town of Meredith, NHDOT, Railroad owners            | N/A                       | Completed | N/A | Letter sent in 2006. Reportedly railroad ties have been removed.   |
| <b>GOOD HOUSEKEEPING</b>    |   |   |                           |           |     |  |
| Road Management             | 1) Implement a comprehensive and collaborative road maintenance management program in the watershed that safeguards public safety, identifies ecologically-sensitive areas, identifies corresponding low salt zones, and uses techniques for minimizing the use of deicing materials. | Towns, NHDES, NHDOT, WWAC, Lake and Homeowner Assns | NHDES, Other Grants       | Ongoing   | N/A | WWAC requested Meredith DPW treat Water St. and Waukegan St. as a low salt area for snow removal/treatment. Practice has been implemented and appropriate signage installed.                             |
| Road Management             | 2) Encourage new road designs that limit imperviousness and minimize negative environmental effects.  | Boards of Selectmen, Planning Boards, NHDES, NHDOT  | N/A                       | Ongoing   | N/A | In Meredith this is done via road waiver standards with all new road construction projects.  |
| Materials Management        | 1) Dispose material from street sweeping, catch-basin sump cleaning, and snow collection in an environmentally-sound manner.  | Town Department of Public Works                     | N/A                       | Ongoing   | N/A | In Meredith the snow dump is only for snow. Street sweeping material is not considered hazardous and is disposed of as solid waste. Catch basin material is deposited in a DES approved retention basin. |
|                             | 2) Recommend that the state prohibit transport of hazardous material cargoes and petroleum transport trucks through the watershed, except on major State roads. Local residential delivery is not included.   | Towns, LRPC, NHDOT                                  | N/A                       | Completed | N/A | This action has been tabled by the WWAC. Roads of concern were monitored in 2013 to determine the actual threat. No hazardous material carrying vehicles were observed traveling the road.               |

## A Watershed Restoration Plan for Lake Waukegan and Lake Winona

|                             |   |  |                                 |                      |     |   |
|-----------------------------|---|--|---------------------------------|----------------------|-----|---|
|                             | 3) Develop an Emergency Response Spill Plan for the watershed that protects Lake Waukegan as a source of public drinking water.   | Town Water Departments, Fire Departments               | N/A                             | Updated every 5 yrs. | N/A | Local Emergency Operations Plan addresses this action item.   |
| BMP Maintenance             | 1) Integrate maintenance agreements into structural BMPs to ensure continued maintenance and proper functioning.  | Town Department of Public Works, Landowners            | Towns, Private, Grants          | 2015-2025            | N/A |   |
| <b>LAND CONSERVATION</b>    |   |  |                                 |                      |     |   |
| Natural Resource Protection | 1) Identify and conserve key properties that protect drinking water supplies and sensitive ecological features in the watershed. Use tools such as buildout analyses, GIS, and natural resource inventories to target critical land for protection. | Conservation Commissions, LRCT, SPNHF, BCCD            | NHDES, LRCT, Private, Donations | Ongoing              |     | Individual Conservation Commissions, land trusts continue to work to conserve important parcels of land. In 2014, LRCT acquired 192 acre parcel on Fogg Hill, Center Harbor and in 2015 acquired another 43 acre parcel for a total of 235 conserved acres. The Fogg Hill Conservation Area forms part of a 900+ acre unfragmented woodland and wetland habitat in the Waukegan watershed, and is located within one of the highest priority areas for conservation in the town. It has significant ecological, wildlife habitat, scenic, water quality, and recreational values. |
|                             | 2) Protect natural areas that are essential for the control of stormwater runoff.   | Conservation Commissions, LRCT, BCCD                   | NHDES, LRCT, Private, Donations | Ongoing              | TBD | Center Harbor and Meredith have Wetlands Overlay Districts. New Hampton, Ashland, and Holderness do not have Wetland Ordinances   |
| Funding                     | 1) Add extra tax to town property bills that goes into a lake protection fund. Develop a subcommittee that determines how the funding is spent.   | Towns  | Towns, Fees                     | 2015-2025            | N/A |   |
|                             | 2) Solicit residents for individual donations.  | Lake & Homeowner Assns, LRCT, Conservation Commissions | Private, Donations              | 2015-2025            | N/A |   |

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

**Table 30. Lake Waukewan/Winona Action Plan - Education and Outreach**

| EDUCATION & OUTREACH  |  |  |  |           |                |  |
|---|--|--|--|-----------|----------------|--|
| ACTION ITEM   | DESCRIPTION  | RESPONSIBLE PARTY  | FUNDING SOURCE                           | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)   |
| <b>BMPs</b>   |  |  |  |           |                |  |
| Plan Promotion  | 1) Promote the plan throughout the watershed.  | WWAC, Lake and Homeowner Assns, LWA, LRPC, BCCD, Towns, Landowners | Towns, Private, Volunteer                | Ongoing   | N/A            |  |
| BMP Demonstrations  | 1) Setup demonstration projects at high-visibility residential BMPs throughout the watershed.  | Lake & Homeowner Assns, BCCD, Towns, Landowners                    | NHDES, Other Grants                      | 2015-2025 | \$10,000       |  |
|   | 2) Locate willing volunteers to "demonstrate" what an ideal shoreline buffer looks like and how it functions.  | Lake & Homeowner Assns, BCCD, Towns, Landowners                    | NHDES, Other Grants, Private, Volunteers | 2015-2025 | N/A            |  |
|   | 3) Continue to host workshops on vegetative buffers and landscaping by the water's edge for local residents.   | Lake & Homeowner Assns, BCCD, Towns, Landowners                    | NHDES, Other Grants, Donations           | Ongoing   | \$2,000        | 2011- UNH Cooperative Extension held Healthy Waterfront Property Workshop for the Lakes Region Board of Realtors. BCCD held 'Landscaping by Water's Edge' in Moultonborough in 2012, Meredith hosted a Shoreland Protection Workshop in 2014 |
| BMP Educational Materials   | 1) Develop and send letters to residents in the spring showing before/after photos of implemented BMPs.  | Lake & Homeowner Assns   | Donations, Fundraisers                   | 2015-2025 | \$1,000        |  |
|   | 2) Continue to distribute educational packets to businesses and industries in the watershed about safeguarding water quality through BMP implementation. | Town Water Departments   | Town Water Departments                   | 2015-2025 | N/A            |  |
| Self-Assessment Tool - Stormwater Footprint calculator - 'What's Your P?' | Encourage homeowners to calculate their stormwater footprint and determine the positive impact from BMP implementation                                   | LWA, BCCD, Towns, WWAC, NHDES                                      | N/A                                      | Ongoing   |                | Online Stormwater Footprint Calculator available on the Winnepesaukee Gateway at <a href="http://winnepesaukee.gateway.org/resources/phosphorus-calculator/">http://winnepesaukee.gateway.org/resources/phosphorus-calculator/</a>           |

## A Watershed Restoration Plan for Lake Waukegan and Lake Winona

| ACTION ITEM                  | DESCRIPTION   | RESPONSIBLE PARTY                         | FUNDING SOURCE   | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)  |
|------------------------------|---|---|--|-----------|----------------|---|
| Door-to-Door BMP Education   | Enlist volunteers to go door-to-door to inform neighbors about erosion, BMPs, and programs that can help.   | Lake & Homeowner Assns                    | Volunteers   | 2015-2017 | N/A            |   |
| <b>NPS Pollution</b>         |   |   |  |           |                |   |
| Educational Signage          | 1) Install educational signs at select locations in the watershed, such as "Scoop the Poop!"  | Towns, Lake & Homeowner Assns             | Grants, Fundraisers  | 2015-2017 | \$250          |   |
| P-Based Products             | 1) Educate residents that urine and some household products contain phosphorus that can be harmful in excessive amounts to the lake's ecology.  | Lake & Homeowner Assns, WWAC, BCCD, Towns | Volunteers   | Ongoing   | N/A            |   |
| Spill Prevention & Awareness | 1) Educate homeowners about spill liability, methods of secure storage and spill prevention, how to get tanks inspected, changes in consumption rates, how sump pumps can contaminate water resources, what to do if a leak is found, and permit and code requirements. | Towns, NHDES                              | NH Small Outreach and Education Grants for Nonpoint Source Pollution | 2015-2025 | N/A            | Home Heating Oil Tanks - A Hidden Threat?' document created and published in the June 2007 Waukegan ShoreOwners Association newsletter. Article also submitted to other local newspapers. |
|                              | 2) Educate local residential heating fuel distributors about the locations of public water supplies in the watershed and inform them about their susceptibility to spills. Remind companies about spill reporting requirements.   | Town Planning Departments                 | Towns  | Ongoing   | N/A            |   |
| <b>Community Involvement</b> |   |   |  |           |                |   |
| Winnepesaukee Gateway        | Keep the Winnepesaukee Gateway website current, and include up-to-date information about watershed efforts, ongoing activities, and interactive water quality data.   | LWA, LRPC                                 | Donations, Fundraisers   | Ongoing   | \$5,000        | <b>Map Atlas, 'What's Your P?' stormwater footprint calculator, water quality data map feature are new tools, resources added to the Gateway since 2010.</b>                              |
| Publicity                    | Publicize events and lake quality updates through local newspapers and newsletters.   | WWAC, Towns, Lake and Homeowner Assns     | Donations, Fundraisers   | 2015-2025 | \$500          |   |
| Educational Kiosk            | Maintain kiosk at Waukegan boat ramp with educational posters/signs conveying issues related to the boat launch, no wake zone, cyanobacteria, etc.  | WWAC, Towns, Lake and Homeowner Assns     | Donations, Fundraisers   | 2015-2016 | \$1,500        |   |
| Donations                    | Build a donation box, and encourage landowners to donate to watershed restoration efforts.  | WWAC, Lake and Homeowner Assns            | Donations, Fundraisers   | 2015      | \$100          |   |

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

| ACTION ITEM                    | DESCRIPTION  | RESPONSIBLE PARTY  | FUNDING SOURCE          | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)  |
|--------------------------------|--|--|-------------------------|-----------|----------------|---|
| <b>Community Involvement</b>   |  |  |                         |           |                |   |
| Discovery Cruises              | Organize an annual discovery cruise/paddle on the lake.  | Lake & Homeowner Assns   | Volunteers, Grants      | 2015-2025 | \$250          |   |
| <b>Roads</b>                   |  |  |                         |           |                |   |
| Road Maintenance BMPs          | 1) Educate town officials, road maintenance personnel, and contractors through roadway BMP outreach workshops.   | BCCD, Towns  | Grants, Towns           | 2015-2025 | \$1,000        |   |
|                                | 2) Salt Reduction: Require Green SnoPro certification for DPWs, and commercial snow removal contractors  | Towns, Homeowner & Lake Assns                                    | NHDES, UNH, Contractors | 2015-2025 | N/A            |   |
| Road Associations              | 1) Consider forming private road associations in key neighborhoods or heavily-used roads for better management by local stakeholders.  | Lake and Homeowner Assns   | Volunteers              | 2015-2025 | N/A            |   |
|                                | 2) Host a Gravel Roads workshop for road associations every two years.   | BCCD, Towns  | Grants                  | 2015-2025 | \$1,000        |   |
| <b>Aquatic Invasives</b>       |  |  |                         |           |                |   |
| Lake Host/Boat Launch Brochure | Continue the Lake Host program and distribute information about inspection of boats before and after launching.  | NH LAKES, Windy Waters Conservancy, WWAC, Lake & Homeowner Assns | Grants, Donations       | Ongoing   | \$500          | Lake Waukewan has an active lake host program   |
| Weed Watchers Program          | Continue the Weed Watchers Program on Lake Waukewan to prevent milfoil and other invasive species from becoming established. Hold annual trainings for identification of native vs. invasive plants. | Lake Associations, NHDES   | Volunteers              | Ongoing   | N/A            |   |
| <b>Recreational Activities</b> |  |  |                         |           |                |   |
| Recreational Boating           | 1) Continue to educate boaters who have inboard motors to use oil absorbing pillows or "bilge socks" to prevent pollutants from entering the lake.   | WWAC, Towns, Lake & Homeowner Assns                              | In-kind, Grants         | Ongoing   | N/A            | In 2007, the Waukewan Watershed Advisory Committee gave out free bilge pillows to every I/O boat on Lake Waukewan and Winona with a note on how to use and where to purchase replacements. Consider doing this every few years. |

## A Watershed Restoration Plan for Lake Waukegan and Lake Winona

| ACTION ITEM                         | DESCRIPTION   | RESPONSIBLE PARTY  | FUNDING SOURCE  | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)  |
|-------------------------------------|---|--|---|-----------|----------------|---|
| <b>Recreational Activities</b>      |   |  |   |           |                |   |
| Recreational Boating                | 2) Continue to educate boaters (residents and visitors) that Lake Waukegan is a public drinking water source, about safe fueling practices, the availability of MtBE-free gasoline, servicing and cleaning of boats, and invasive species prevention. | Towns, NH LAKES, WWAC, Lake Host Program, Lake and Homeowner Assns | NHDES, Other Grants   | Ongoing   | N/A            |   |
|                                     | 3) Educate swimmers about the importance of Lake Waukegan as a public water supply and about healthy swimming etiquette (e.g. use of restrooms, no diapers allowed in lake).  | Towns  | NHDES, Other Grants   | Ongoing   | N/A            | In 2014 WWAC commissioned a mural on retaining wall at town beach to raise awareness of protecting lake quality   |
|                                     | 4) Provide permanent restroom facilities at the Meredith Town Beach on Lake Waukegan.   | Meredith   | Town of Meredith  | Complete  | N/A            | Permanent rest rooms completed in 2008  |
| Fireworks Research & Education      | 5) Continue to provide temporary restrooms in appropriate access sites for boating enthusiasts. Consider developing a long-term funding source for this action item.  | Towns  | General Appropriations  | Ongoing   | N/A            | Port A Potty placed at Lake Waukegan boat ramp. Funding provided by Town of Meredith for 2010 and 2011.   |
|                                     | 1) Investigate the effects of fireworks on lake water quality, and distribute information via website, or develop an informational brochure on results.   | Lake Associations, NHDES, UNH                                      | Grants  | 2015-2016 | \$500          |   |
| <b>Septic Systems</b>               |   |  |   |           |                |   |
| Septic System Maintenance Awareness | 1) Distribute educational pamphlets on septic system function and maintenance in tax bills.   | WWAC, Homeowner Assns, Lake Assns, Towns                           | NHDES, Towns, Private, Volunteer                                    | 2015-2025 | \$1,000        | In 2008 Meredith created and distributed a one page "Caring for Lake Waukegan: It Starts at Home" document. Septic System Reference material can be found <a href="http://www.winnipesaukee.org/category/programs-2/lakeside-learning/">http://www.winnipesaukee.org/category/programs-2/lakeside-learning/</a> |
|                                     | 2) Continue to host Septic Sense Seminars to address link between septic system maintenance and water quality.  | LWA, WWAC, Homeowner Assns, Lake Assns, Towns                      | Granite State Designers & Installers Assn (GSDIA), Towns, Volunteer | 2015-2025 | \$250/yr       |   |

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

| ACTION ITEM                    | DESCRIPTION  | RESPONSIBLE PARTY  | FUNDING SOURCE   | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)  |
|--------------------------------|--|--|--|-----------|----------------|---|
| <b>Septic Systems</b>          |  |  |  |           |                |   |
| Targeted Septic Outreach       | 1) Continue to focus outreach on neighborhoods with properties that have no septic systems on town record.   | WWAC,<br>Homeowner Assns,<br>Lake Assns, Towns                       | Grants, Volunteers   | 2015-2017 | \$1,000        | Meredith's Health Regulation adopted in 2013 targets properties located within 250' of Lake Waukewan, which have no record of operational approval on file.   |
|                                | 2) Focus septic system maintenance education at campgrounds.   | WWAC,<br>Homeowner Assns,<br>Lake Assns, Towns                       | Volunteers   | 2015-2017 | \$500          |   |
|                                | 3) Conduct door-to-door septic education to follow-up on septic survey.  | WWAC,<br>Homeowner Assns,<br>Lake Assns, Towns,<br>Landowners        | Volunteers   | 2015-2017 | N/A            |   |
| Septic Provider List           | 1) Create and distribute a list of septic service providers (create magnets, etc.).  | WWAC,<br>Homeowner Assns,<br>Lake Assns, Towns,<br>Landowners        | Volunteers,<br>Fundraisers   | 2015-2017 | \$500          |   |
| <b>Development/Landscaping</b> |  |  |  |           |                |   |
| Landscaping                    | 1) Continue to educate homeowners and businesses about lawn care and landscaping techniques that minimize impacts on water resources (e.g. water conservation, native plant species, low maintenance grasses, and low-phosphorus lawn and garden fertilizers). | Towns, Local lake Assns, BCCD, WWAC, NHDES                           | NH DES Small Outreach and education Grants for Nonpoint Source Pollution | 2015-2020 | \$500          | 2011- UNH CE held Healthy Waterfront Property Workshop for the Lakes Region Board of Realtors in Meredith. 2012 - BCCD held 'Landscaping by Water's Edge' 2014- Meredith hosted a Shoreland Protection Workshop<br>The WWAC developed the 'Don't P in the Lake' campaign in 2009/2010. Meredith town fields and lawns converted to low/no phosphorus and no pesticides. Education/outreach was performed by BOS, Meredith Rotary, Kiwanis |
| Fertilizer Use                 | 1) Continue to promote use of phosphorus-free fertilizers or no fertilizers, such as "Don't P in the Lake" campaign  | LWA, NH LAKES, WWAC, Lake & Homeowner Assns, BCCD, Towns, Landowners | Private, Volunteer   | Ongoing   | \$500          |   |
| Workshops                      | 1) Hold informational workshops for new landowners and developers on local ordinances and watershed goals.   | Conservation Commissions, NHDES, Towns, LWA, LRPC, BCCD              | NHDES, Towns, Fundraisers  | 2015-2025 | \$250/yr       |   |

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

| ACTION ITEM                    | DESCRIPTION  | RESPONSIBLE PARTY   | FUNDING SOURCE                    | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)  |
|--------------------------------|--|---|-----------------------------------|-----------|----------------|---|
| <b>Development/Landscaping</b> |  |   |                                   |           |                |   |
| Workshops                      | 2) Hold educational workshops on conservation easements in the region. Reach out to large landowners to discuss conservation options.              | Conservation Commissions, Lakes Region<br>Conservation Trust, SPNHF | NHDES, Towns, Fundraisers, Grants | 2015-2025 | \$250/yr       |   |
| Training                       | 1) Require State-sponsored training for code enforcement officers and ZBAs in watershed towns.   | Towns   | Towns                             | 2015-2025 | \$5,000        |   |
|                                | 2) Require contractors to have adequate training in the installation and maintenance of Low Impact Development (LID) and BMPs for all permit work. | Towns   | Contractors                       | 2015-2025 | N/A            |   |
|                                | 3) Require Green SnoPro certification for DPWs, and commercial snow removal contractors  | Towns, Homeowner & Lake Assns                                       | NHDES, UNH, Contractors           | 2015-2025 | N/A            | <a href="http://t2.unh.edu/green-snowpro-training-and-certification">http://t2.unh.edu/green-snowpro-training-and-certification</a> |

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

**Table 31. Lake Waukewan/Winona Action Plan - Water Quality Monitoring**  
**WATER QUALITY MONITORING**

| ACTION ITEM                     | DESCRIPTION  | RESPONSIBLE PARTY  | FUNDING SOURCE  | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)   |
|---------------------------------|--|--|---|-----------|----------------|--|
| <b>LAKES</b>                    |  |  |   |           |                |  |
| Expand Lake Monitoring Program  | 1) Extend lake monitoring season April through November (or year-round) to capture spring and fall turnover and timing of potential algal blooms.  | Lake Associations, Volunteers, NHDES VLAP                    | Lake Associations, NHDES                                | 2015-2025 | \$250          | Current monitoring season generally runs July through September, with one sample collected at each site per month. |
|                                 | 2) Recruit and train additional VLAP volunteers.   | Lake Associations, Volunteers, NHDES VLAP                    | Lake and Homeowner Associations, Volunteers, NHDES VLAP | 2015-2025 | N/A            |  |
|                                 | 3) Increase frequency of Secchi Disk Transparency and DO/temperature profile readings. More data on DO profiles could help determine the extent of DO depletion and how it relates to sediment phosphorus release. | Lake Associations, Volunteers, NHDES VLAP                    | Lake and Homeowner Associations, Volunteers, NHDES VLAP | 2015-2025 | N/A            |  |
| Weed Watch & Lake Host Programs | 1) Continue Weed Watcher program; recruit new volunteers, conduct routine surveys of dam, tributaries, and shallows during summer months.  | Lake Associations, Homeowner Associations, Volunteers, NHDES | Lake and Homeowner Assns., NHDES, Volunteers            | Ongoing   | N/A            |  |
|                                 | 2) Support State legislation that increases funds for aquatic invasive plant (e.g. milfoil) eradication.   | Lake Associations, Volunteers, NHDES, NH LAKES               | Lake Assns., Homeowner Assns., Residents, Towns         | 2015-2025 | N/A            |  |
|                                 | 3) Increase the number of volunteer inspectors for the Lake Host program at Lake Waukewan. Consider adding Lake Winona to program.   | Lake Associations, Volunteers, NH LAKES                      | Lake Associations, Towns, Volunteers                    | 2015-2025 | N/A            |  |
| Cyanobacteria Monitoring        | 1) Work with UNH and NHDES to implement a formal cyanobacteria monitoring program for the lakes.   | Lake Associations, UNH, NHDES                                | Lake Assns, Towns, NHDES, UNH                           | 2015-2025 | TBD            |  |

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

| ACTION ITEM              | DESCRIPTION   | RESPONSIBLE PARTY                             | FUNDING SOURCE                 | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016)   |
|--------------------------|---|---|--------------------------------|-----------|----------------|--|
| <b>LAKES</b>             |   |   |                                |           |                |  |
| Cyanobacteria Monitoring | 2) Host a cyanobacteria talk in coordination with UNH every few years.  | Lake Assns, Towns, UNH, NHDES                 | UNH, NHDES, Donations          | 2015-2016 | \$250          | Last one held in Meredith in 2011.   |
| Sediment Cores           | Work with PSU to examine sediment cores for phosphorus, copper and other parameters; use students to assist with studies.   | Lake Assns, Towns, NHDES, PSU                 | NHDES, PSU                     | 2015-2020 | N/A            |  |
| Boat Traffic Study       | 1) Consider collecting data (TP, Chl-a, Color, Turbidity, and SDT) before, during, and after busy holiday weekends to examine effects of boat traffic. Consider adding boat counts, time lapse photography, and the use of a submerged sonde to quantify the effects of boat traffic. | Lake Assns, NHDES, Consultant                 | Lake Assns, Donations          | 2015-2020 | \$5,000        |  |
|                          | 2) Implement a monitoring program to assess concentrations of gasoline constituents including MtBE in Lake Waukewan from May to September   | Meredith Water Dept., UNH, NHDES              | Meredith Water Dept.           | Completed |                | Monitoring program began in 2005. 2007 - Monthly reports from June through Oct.; no issues found, 2008- no issues found. No VOC testing has been done since 2008. MtBE fuel no longer sold in NH |
|                          | 3) Further research is needed to assess whether or not the drinking water intake in Lake Waukewan should have an isolation zone, demarcated by buoys, in which motorized activity should not occur.   | Lake Assns, Meredith, NHDES, NH Marine Patrol |                                | LWA       | Ongoing        | TBD  |
| Shoreline Septic Systems | Develop a water quality monitoring program that identifies failing septic systems along the shorelines.   | Town Water & Sewer Department, Meredith       | NHDES, Other Grants, Donations | Completed |                | Town of Meredith did a one-time water testing at 9 locations on Lake Waukewan in order to detect failing septic systems. The results were inconclusive   |
| Data Access              | Continue to provide water quality data on the Winnepesaukee Gateway website.  | LWA, NHDES                                    | Donations, Grants              | Ongoing   | N/A            | LWA uploads water quality data on an annual basis to the Winnepesaukee Gateway   |

## A Watershed Restoration Plan for Lake Waukewan and Lake Winona

| ACTION ITEM                         | DESCRIPTION  | RESPONSIBLE PARTY                     | FUNDING SOURCE                             | SCHEDULE  | ESTIMATED COST | STATUS (As of June 2016) |
|-------------------------------------|--|---------------------------------------|--|-----------|----------------|--------------------------|
| <b>TRIBUTARIES</b>                  |  |                                       |  |           |                |                          |
| Expand Tributary Monitoring Program | 1) Conduct intensive tributary monitoring at new and existing stations in the watershed to better understand the effects of nutrient and sediment loading to the lake. Include both wet and dry weather sampling events and collect flow data to help further quantify nutrient loading from individual tributaries. | Lake Assns, WWLSAC, PSU, Towns        | NHDES, Other Grants, Donations, Volunteers | Ongoing   | \$1,000/yr     |                          |
| Year-Round Sampling                 | Consider collecting year-round and/or continuous monitoring data in several of the streams to further characterize loading and flow during different times of the year.  | Lake Assns, WWLSAC, NHDES, PSU, Towns | NHDES, Other Grants, Donations, Volunteers | 2015-2025 | \$500/yr       |                          |
| Bracket Sampling                    | Conduct bracket sampling upstream of sampling locations to identify potential sources of increased loading, particularly for subwatersheds with the highest TP loading (e.g. Winona East Inlet, Snake River, and Reservoir Brook).   | Lake Assns, WWLSAC, NHDES, PSU, Towns | NHDES, Other Grants, Donations, Volunteers | 2015-2025 | \$500          |                          |
| Storm Events                        | Train volunteers to monitor during storm events at road crossings and culverts near the shorelines. Use information to identify problem areas and recommend solutions.   | Lake Assns, WWLSAC, NHDES, PSU, Towns | NHDES, Other Grants, Donations, Volunteers | 2015-2025 | \$500          |                          |
| Mapping Update                      | Develop a detailed drainage network map of persistent and intermittent streams and tributaries that can be used to guide water quality monitoring, road maintenance, stormwater management, development, review, and emergency response planning.  | LRPC, Towns, NHDES, PSU               | NHDES, Other Grants, Donations, Volunteers | Ongoing   | N/A            |                          |
| Continuous Loggers                  | Add continuous loggers for stage/flow, temperature, dissolved oxygen, conductivity, turbidity, etc. at key sampling locations throughout the watershed.  | Lake Assns, PSU, NHDES, Towns         | NHDES, Other Grants, Donations, Volunteers | 2015-2025 | \$3,000/yr     |                          |

## 7.2 Indicators and Benchmarks to Measure Progress

Establishing indicators and numeric targets (benchmarks) to quantitatively measure the progress of this plan will provide both short and long-term input about how successful the plan has been in meeting the established goals and objectives for the watershed.

Indicators are derived directly from tasks identified in the Action Plan. While the Action Plan provides a description of tasks, responsible parties, a schedule, and estimated annual costs associated with each task, the indicators are developed to reflect how well implementation activities are working, and provides a means by which to track progress toward established goals and objectives.

The following environmental, programmatic, and social indicators and associated benchmarks will help measure the progress of this plan. These benchmarks represent short-term (2017), mid-term (2020), and long-term (2025) targets for improving water quality in these waterbodies. Setting benchmarks allows for periodic updates to the plan, maintains and sustains the action items, and makes the plan relevant to ongoing activities. The advisory committee will review the benchmarks for each indicator on an ongoing basis to determine if progress is being made, and then determine if the watershed plan needs to be revised because the targets are not being met.

**Environmental Indicators** are a direct measure of environmental conditions. They are measurable quantities used to evaluate the relationship between pollutant sources and environmental conditions. They assume that BMP recommendations outlined in the Action Plan will be implemented accordingly and will indirectly result in water quality improvement, including reductions in median in-lake TP concentrations, the duration and extent of anoxic conditions at deep holes, and the frequency of peak flows to tributaries from unbuffered impervious or bare soil surfaces that carry phosphorus-laden sediment.

**Table 32. Environmental Indicators to measure progress in plan implementation and toward established goals.**

| <b>Environmental Indicators</b>   |                   |             |             |
|---|-------------------|-------------|-------------|
| <b>Indicators</b>   | <b>Benchmarks</b> |             |             |
|   | 2017              | 2020        | 2025        |
| Improvement in mean annual water clarity  | + 0.1 m           | + 0.25 m    | + 0.4 m     |
| Reduction in median in-lake phosphorus concentration. Goal: 4.95 ppb for Lake Waukewan; 6.30-6.65 ppb for Lake Winona | 10% of goal       | 30% of goal | 75% of goal |
| Reduction in frequency and number of algal blooms   |                   |             |             |
| Reduction in number of beach postings/closures due to elevated <i>E.coli</i> (bacteria) levels                        |                   |             |             |
| Reduction in erosion and sedimentation issues throughout the watershed  |                   |             |             |
| Increase in fish and wildlife species populations   |                   |             |             |

**Programmatic Indicators** are indirect measures of watershed protection and restoration activities. Rather than indicating that water quality reductions are being met, these programmatic measurements list actions intended to meet the water quality goal.

**Table 33. Programmatic Indicators to measure progress in plan implementation and toward established goals.**

| <b>Programmatic Indicators</b>   |                   |           |           |
|--|-------------------|-----------|-----------|
| <b>Indicators</b>  | <b>Benchmarks</b> |           |           |
|  | 2017              | 2020      | 2025      |
| Amount of funding secured for plan implementation through fundraisers, donations, and grants | \$50,000          | \$150,000 | \$300,000 |
| Successful completion of annual review and update of the plan                                |                   |           |           |
| Number of priority sites remediated with recommended BMPs                                    |                   |           |           |
| Number of high-visibility residential BMP demonstration projects completed                   |                   |           |           |
| Linear feet of roadway addressed by BMPs   |                   |           |           |
| Number of shoreline properties showing improved survey scores                                |                   |           |           |
| Linear miles of stabilized streambanks or shorelines   |                   |           |           |
| Number of culverts stabilized or retrofitted   |                   |           |           |
| Number of retrofitted stormdrains/catch basins   |                   |           |           |
| Number of voluntary septic system inspections  |                   |           |           |
| Number of sewer or septic system upgrades  |                   |           |           |
| Number of acres of new land in conservation  |                   |           |           |
| Number of new conservation subdivisions  |                   |           |           |
| Number of new or re-developments using LID techniques  |                   |           |           |
| Number of watershed-based educational materials distributed                                  |                   |           |           |
| Number of educational signage posted throughout the watershed                                |                   |           |           |
| Number of new water quality monitoring sites added   |                   |           |           |
| Number of sites monitored during storm events and year-round                                 |                   |           |           |
| Number of sites with continuous data loggers   |                   |           |           |

**Social Indicators** measure changes in social or cultural practices and behavior that lead to implementation of management measures and water quality improvement.

**Table 34. Social Indicators used to measure progress in plan implementation and toward established goals.**

| <b>Social Indicators</b>  |                   |      |      |
|---|-------------------|------|------|
| <b>Indicators</b>   | <b>Benchmarks</b> |      |      |
|   | 2017              | 2020 | 2025 |
| Number of new lake association members  |                   |      |      |
| Number of new stakeholders on the advisory committee  |                   |      |      |
| Number of homeowners who participate in "septic socials"  |                   |      |      |
| Number of landowners receiving free landowner assistance for septic system maintenance and upgrades |                   |      |      |
| Number of homeowners who participate in residential demonstration projects/workshops                |                   |      |      |
| Number of volunteers who sign up for BMP implementation projects                                    |                   |      |      |
| Number of volunteers participating in door-to-door education campaigns                              |                   |      |      |
| Number of people participating in educational workshops   |                   |      |      |
| Number of people attending annual spring plant sale   |                   |      |      |
| Number of people participating in online Self-Assessment Quiz                                       |                   |      |      |
| Number of new road associations   |                   |      |      |
| Number of contractors completing a BMP or LID training  |                   |      |      |
| Number of new regulations or new/amended ordinances passed by citizen support                       |                   |      |      |
| Number of landowners with >10 acre lots participating in land conservation programs                 |                   |      |      |
| Number of new and active "Lake Hosts"   |                   |      |      |
| Number of new and active "Weed Watchers"  |                   |      |      |
| Number of newly-trained NHDES VLAP volunteers   |                   |      |      |
| Number of new volunteers and sponsors for water quality monitoring                                  |                   |      |      |

### ***7.3 Estimated Costs and Technical Assistance Needed***

The cost of successfully implementing this watershed plan for Lake Waukewan and Lake Winona is estimated at \$324,200 over the next 10 years (Table 35). However, many costs are still unknown and should be incorporated into the Action Plan as information becomes available. This includes both structural BMPs, such as fixing eroding roads and planting shoreline buffers, and non-structural BMPs, such as improving ordinances. Annual BMP costs were estimated based on a 10-year total for the initial BMP installation plus 10 years of maintenance. Therefore, the annual BMP costs are not truly representative of how funds will likely be allocated during implementation since the annual costs may be higher earlier in the 10-year plan and less toward the end.

**Table 35. Estimated annual and 10-year costs for watershed restoration.**

| <b>Category</b>                                    | <b>Estimated Annual Costs</b> | <b>10-year Total</b> |
|--|-------------------------------|----------------------|
| Wastewater Systems                                 | \$3,850                       | \$38,500             |
| Best Management Practices (BMPs)                   | \$14,600                      | \$146,000            |
| Municipal Ordinance, Planning, & Land Conservation | \$4,500                       | \$45,000             |
| Education & Outreach                               | \$3,270                       | \$32,700             |
| Water Quality Monitoring                           | \$6,200                       | \$62,000             |
| <b>Total Cost</b>                                  | <b>\$32,420</b>               | <b>\$324,200</b>     |

A diverse source of funding and a funding strategy will be needed to match these implementation activities. Funding to cover ordinance revisions and third-party review could be supported by municipalities through tax collection, permit fees, or violation fees. Monitoring and assessment funding could come from a variety of sources, including state and federal grants (Section 319, ARM, Moose Plate, etc.), private foundations, and municipalities. Funding for education and outreach might also be expected to come from these sources as well as the local lake associations. Funding to improve septic systems, public and private roads, and shoreland buffers could be expected from property owners most affected by the improvements. As the plan evolves into the future, the Advisory Committee will play a key role in how the funds are raised, tracked and spent to implement and support the plan.

### **7.4 Evaluation of the Plan**

Annual advisory committee meetings should be organized to review the status of goals and objectives presented in this watershed management plan. It is recommended that an adaptive management approach be used to assess annual progress, determine key projects for the following year, and provide a venue for sharing information with watershed stakeholders. Adaptive management is the process by which new information about the health of the watershed is incorporated into the plan. This process allows stakeholders the opportunity to evaluate the effectiveness of restoration and monitoring activities before implementing future actions. Tasks listed in the Action Plan should be tracked and recorded as they occur, and new tasks should be added to the plan as determined through the adaptive management process. All achievements, such as press releases, outreach activities, number of sites repaired, number of volunteers, amount of funding received, and number of sites documented, should be tracked. Stakeholders can then use the established indicators to determine the effectiveness of the plan.

### *7.5 Conclusion*

Watershed residents, landowners, business owners, and recreationalists alike have a vested interest in protecting the long-term water quality of Lake Waukewan and Lake Winona for future generations. The goal of this plan is to improve the dissolved oxygen concentrations in the bottom depths by reducing the amount of pollutants, sediments, and nutrients that enter the lakes. The lake study advisory committee has chosen to reduce the median in-lake phosphorus concentrations by 10% and 5-10% in Lake Waukewan and Lake Winona, respectively, over the next 10 years. This goal can be reached if management actions discussed in this plan are implemented accordingly. Implementation of this plan over the next 10 years is expected to cost \$324,200, and will require the dedication and hard work of municipalities, conservation groups, and volunteers to ensure that the actions identified in this plan are carried out accordingly. The Action Plan will need to be updated as the plan is implemented and new action items are added, in accordance with the adaptive management approach.
